

The Mast Crane is a great option to optimise the performance of your Blokart!

To get the full benefit it works well in conjunction with the Ultra Downhaul 2 (XDH0114) and a full Carbon Mast allowing easy rotation of the head under higher downhaul tension

Contents

- Mast Crane
- Fibreglass Sleeve
- Long D Shackle
- Twist Shackle

Configurations

Supplied with 2 shackles, the sail can be secured directly to the crane or hung from a shackle.

The crane is either fitted into a top section by removing the tip or with the use of the fibreglass sleeve supplied, the crane can be fitted into a second section. This eliminates the standard tip and stiffens up the head of the sail
